Pictures between 228 and 229

The fourth is of the bathroom. Why did you select the only one that does not show the handfprint on the left wall and then reduce it so small that the reader can't see that the wrong part of the windowsill was removed? The inside. Was he shooting the moon? The downward angle of the short is set at 16.63 feet in the official surveyor's report, page 59 of the extradition affidavits.
